

Dental Fund

EXTRACTING NEW OPPORTUNITIES

TARGET DISTRIBUTION: 9% annually, paid quarterly

TARGET RAISE: \$120M

TERM: Five (5) years with up to two (2) additional one-year extensions

Fund Concept

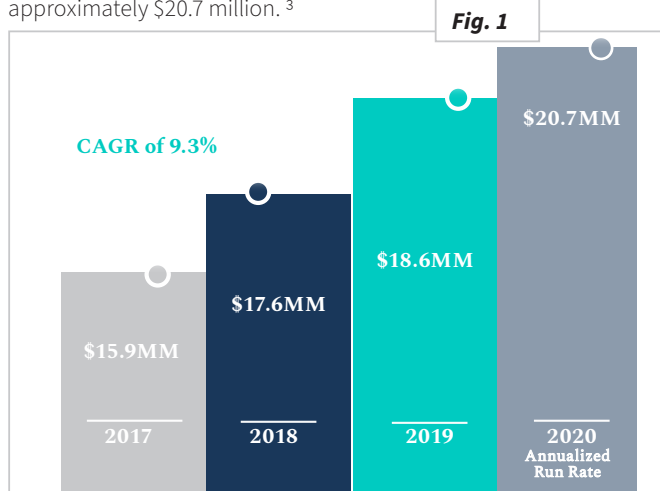

Management believes that dental operations are a consistent and stable source of revenue based on historical data from the dental industry. Dentistry has high net margins relative to other industries operating in the healthcare space, which, in management's opinion, has an ability to convert profits into cash flow. A fund comprised of investments in several well-managed clinics can be an attractive component within a larger portfolio of investments. The dental industry in Canada exhibits a low level of revenue volatility. While, in response to low discretionary income, patients may curb their demand for elective procedures, such as implants, many consumers still routinely visit their dentist for annual or semi-annual need-based procedures, which generally lowers revenue volatility.¹

The Opportunity

The Canadian dental industry is only 2% corporately owned (as per the Canadian Dental Association), whereas the United States dental industry is 30-40% corporately owned², suggesting that a similar trend of consolidation may occur in Canada. The Dental Fund has taken proven dental practices with a strong track record and consolidated them into one fund.

Management

The clinics owned by Dentallook are all established dental practices that have, on average, greater than 20 years of operating history. Collectively, the clinics had approximately 40,000 patients as at December 31, 2020. Total production revenue shown for 2020 reflects run rate based on the 12 clinics owned by Dentallook as at December 31, 2020 and excludes the months that the clinics were required to close due to COVID-19. Annualized run rate of the 12 clinics owned by Dentallook as at December 31, 2020 (including the period in 2020 prior to acquisition by Dentallook) was approximately \$20.7 million.³

TOTAL PRODUCTION REVENUE ACROSS THE PORTFOLIO

Production shown for 2020 and CAGR reflects July to December 2020 run rate based on the 12 clinics owned by Dentallook as at December 31, 2020.³ As at May 30, 2021, Dentallook owns and operates 15 practices in Saskatchewan and Ontario. Total production revenue across the portfolio has a compound annual growth rate of 9.3% for the previous three years.⁴

Newlook Capital
Dental Fund

Dentallook Delivers a Proven Model

Newlook Capital has established Newlook Capital Dental Services Trust ("Dental Fund"), which allows investors to purchase trust units of the Dental Fund. The Dental Fund uses proceeds from the issuance of trust units to purchase 9% secured debentures of Dentallook.⁵ Dentallook uses proceeds from the issuance of debentures to finance the acquisition of dental clinics.

Dentallook is a multi-city, multi-clinic group of practices operating in Saskatchewan and Ontario. Our operating partner, Dr. Said Mazahreh, DDS ("Dr. Sam") has experience growing and acquiring practices. As at May 30, 2021, Dentallook owns and operates 15 dental clinics.

COVID-19 and Revenue

Saskatchewan and Ontario clinics were required to close in March 2020 due to the first wave of COVID-19. Saskatchewan clinics began to reopen on May 4, 2020, and Ontario clinics began to reopen on June 1, 2020. Since the clinics have reopened in their respective provinces, neither the provinces nor the dental colleges have mandated a subsequent shut down of the clinics. Dentallook has prepared and equipped each of the clinics to operate safely in a pandemic environment. Despite the increase in COVID-19 cases in Q3 and Q4 2020, Fig. 2 demonstrates the lack of correlation between COVID-19 cases and total production. Management believes that is attributed to patient confidence in the protocols implemented by the clinics which is further supported by the 2020 annual run rate production relative to 2019 production, as demonstrated in Fig. 1.

QUARTERLY REVENUE VERSUS COVID-19 CASES IN CANADA*

Quarterly revenue shown in Fig. 2 reflects actual revenue of the 12 clinics owned by Dentallook as at December 31, 2020 for the periods indicated.

Management

Elroy Gust (CEO)

Elroy has over 20 years of experience in M & A and private equity. Elroy continues to build management teams to execute fund strategies.

Abbas Osman (CIO)

Abbas has approximately 20 years of experience in M&A and has participated in over 100 transactions. Previously, Abbas was the Group Investment Manager of the Abudawood Group global investment office.

Tony Diab (CFO)

Prior to joining Newlook Capital, Tony worked in public accounting for over nine years specializing in advisory, audit and international tax for both private and public corporations.
